### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the electromagnetic coil (as recited in claim 1) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-5 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, there is insufficient antecedent basis for "said inner metallic sheet and said outer metallic sheet" recited at line 2 in the claim or from the preceding claim. It should be "said inner sheet metal panel and said outer sheet metal panel" for being consistent.

Similarly, in claims 3-5, "after "sheet" (recited at line 1, both occurrences), the phrase "metal panel" should be inserted.

In claim 8, there is insufficient antecedent basis for "said inner metallic sheet and said outer metallic sheet" recited at lines 2-3 in the claim or from the preceding claim. It should be "said inner sheet and said outer sheet metal panel" for avoiding confusion.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Hutton et al (US 4,602,139). Hutton et al shows a hemming machine (Figure 2) for joining an

Art Unit: 3742

inner sheet metal panel 28 with an outer sheet metal panel 26 comprising a hemming tool (shown in Figures 13-14) containing at least an electromagnetic coil 138 (or 140) positioned to electromagnetically crimp or weld or crimp and weld the panels together, a backing die 146 positioned outside the inner and outer sheet metal panels and opposite the coil 138, wherein the panels 26,26 can be of identical metallic materials or dissimilar metallic materials such as steel, aluminum (i.e., car door panels, bodies of trucks, buses, and panels of sheet metals, column 1, lines 19-35).

It is noted that the recited panels have not been given any patentable weight since they are not parts of the claimed hemming machine or process.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Weir (US 4,531,393), Larsen (US 4,950,348), Shank (US 5,365,041), and Pohl (US 6,365,883).
